Historical manual

The following pages document an earlier release. Screen layout, navigation, approvals and digital workflows have changed. Consult your current role manual before completing a task.

Current role manuals are available in Help. The eight current role manuals are in English; Help identifies this language before a PDF is downloaded from another interface language.

Supplier coordinator guide

Real application screens with synthetic data; no customer information.

Revision 2026-09-19 · Validated capture: 2026-09-19T09:56:05.809Z

Contents

1. Authorized installations only
2. Manage technicians
3. Record and submit team hours
4. Operational report and own records
5. When access changes

Authorized installations only

The Owner appoints your supplier profile and authorizes each installation with effective dates. An installation is a project in the portal. Sign in with your own invited account. **Supplier team** lists only authorized installations and technicians. If an installation or person is missing, contact the Owner; never use a substitute project or technician. This operational profile does not grant My Pay, worker statements, compensation, customer rates, margins, finance, billing or approvals.

Manage technicians

Open **Supplier team**, choose the authorized installation and select **Add technician**. Enter the real name, optional email and assignment dates. This creates a personnel record, not login credentials. Use **Assign existing technician** only for someone already in your supplier team. Check the selected installation and effective dates before saving. The Owner, not the coordinator, configures login access and grants.

Record and submit team hours

Under **Record team hours**, select one or more technicians. Enter the actual work date, category, minutes or permitted start/end interval, and factual work description. Save selected drafts, inspect each named subject and submit the selected drafts to J&A. The technician is the subject; your account is the recorded actor. A draft is not approved work. If **needs_changes** appears, use **Create correction draft**, edit and resubmit while the original remains in history. A rejected record needs a new draft. Supplier-origin time requires Owner review; you cannot approve it yourself.

Operational report and own records

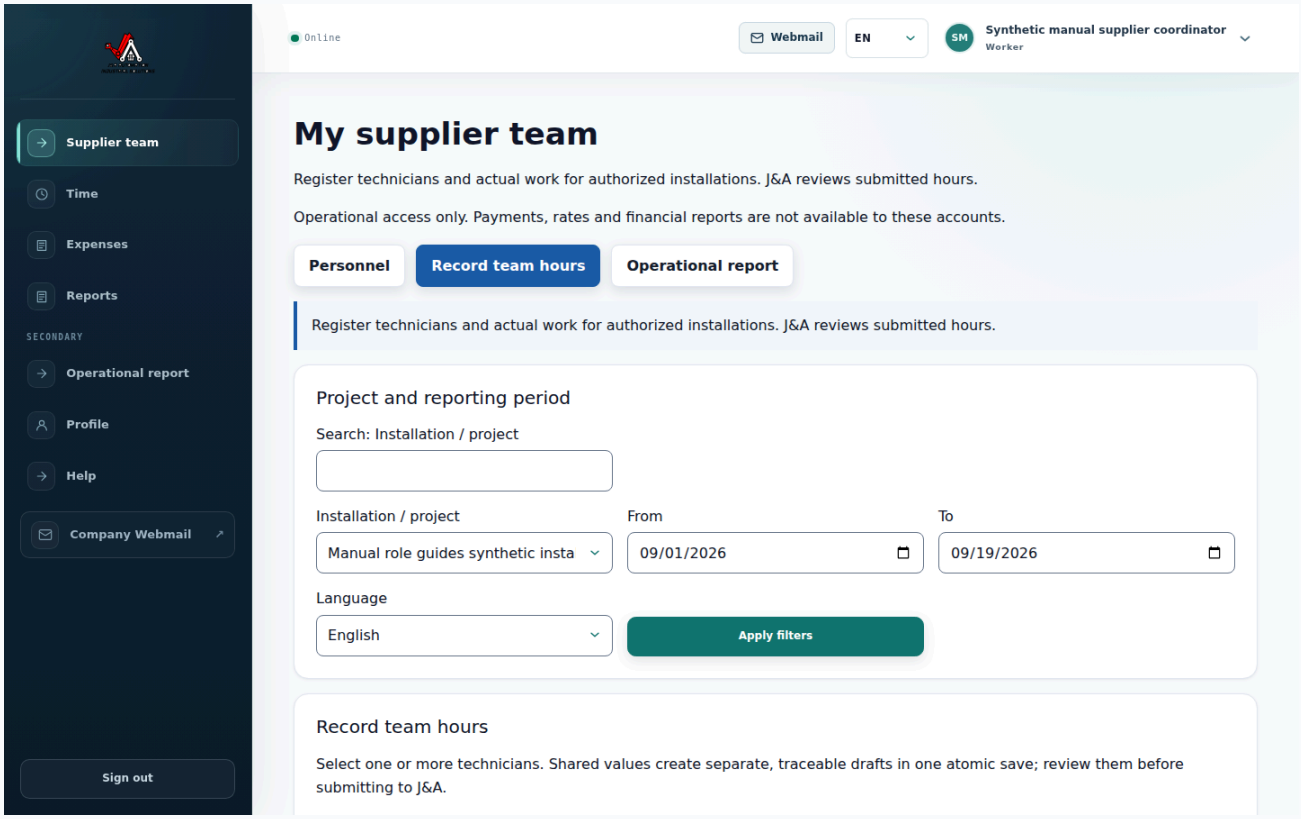

Use **Operational report** to filter installation and dates, inspect approval states, export CSV or print/save a PDF from the browser. Rejected, void and superseded entries do not increase effective totals. This report contains no money and proves neither customer acceptance nor payment. Your own **Time**, **Expenses** and **Reports** are restricted to permitted operational records. Your **Profile** contains your language and security settings; any availability shown there is planning information, with UTC times, not actual work.

When access changes

Revoked or expired installation access blocks future requests, including your own operational records for that installation. A stale screen should be reloaded. If a technician, grant, receipt or report is missing, contact the Owner with the record reference. Do not attempt finance exports, approve your own work or change another supplier's personnel.

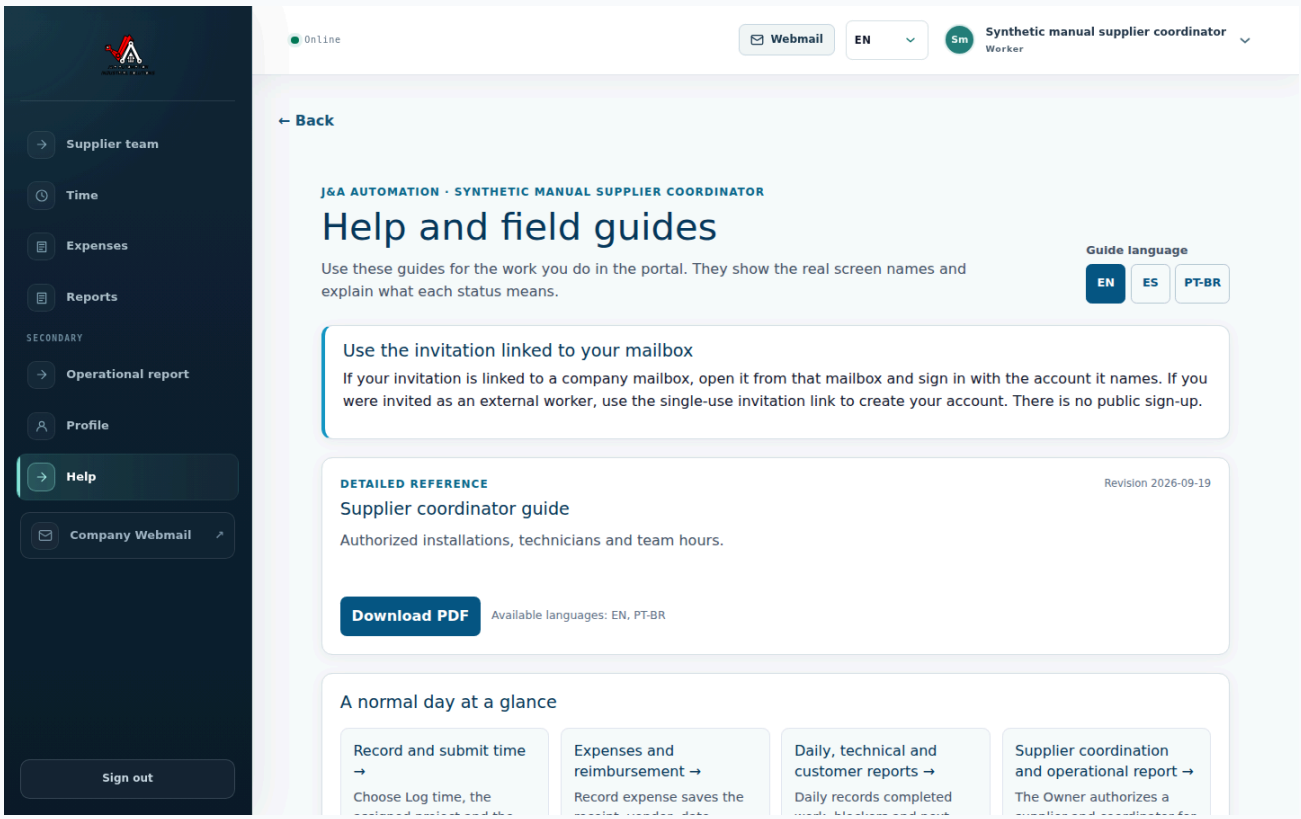

Real application screens with synthetic data

Captured with this role signed into an isolated application; no customer data is shown.

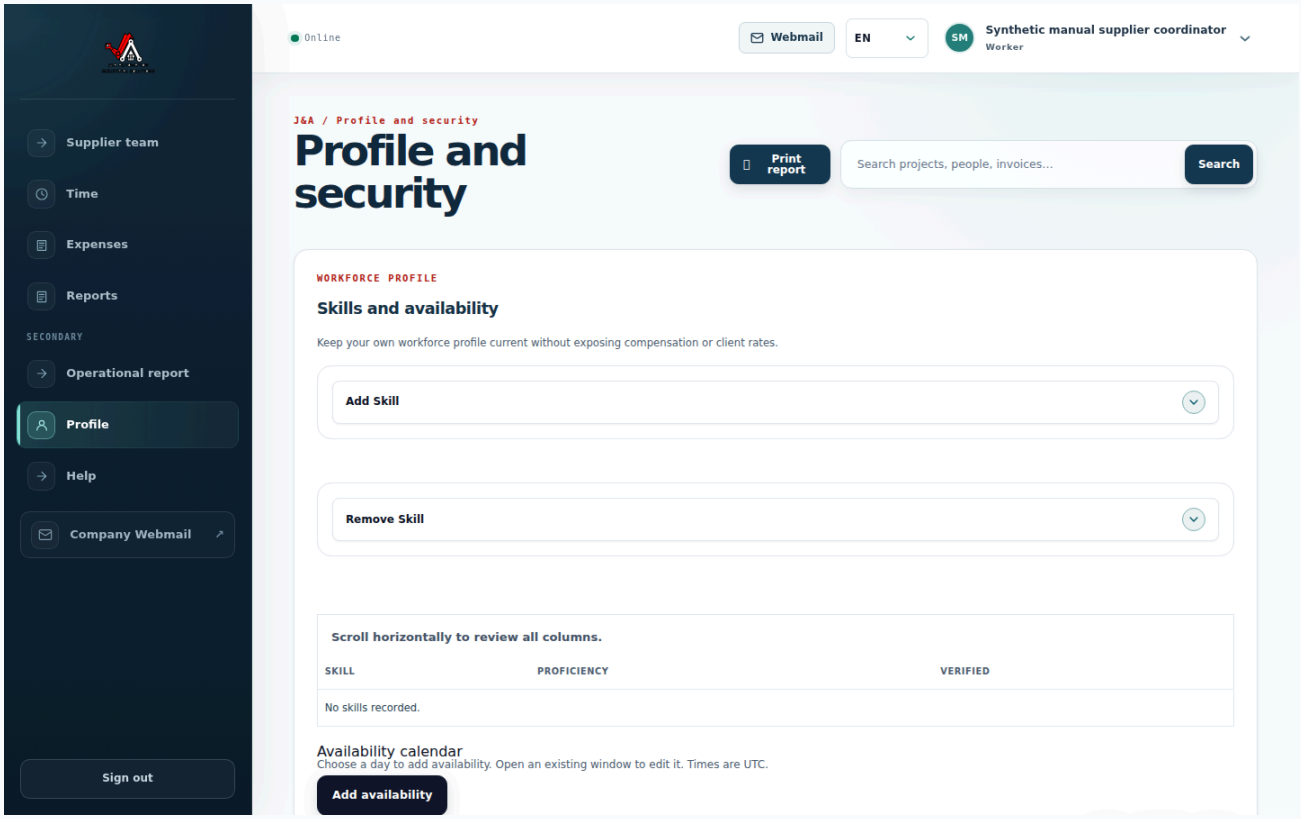

Start here: navigation and work available to this account

`/app/supplier?lang=en` · 1440 × 900

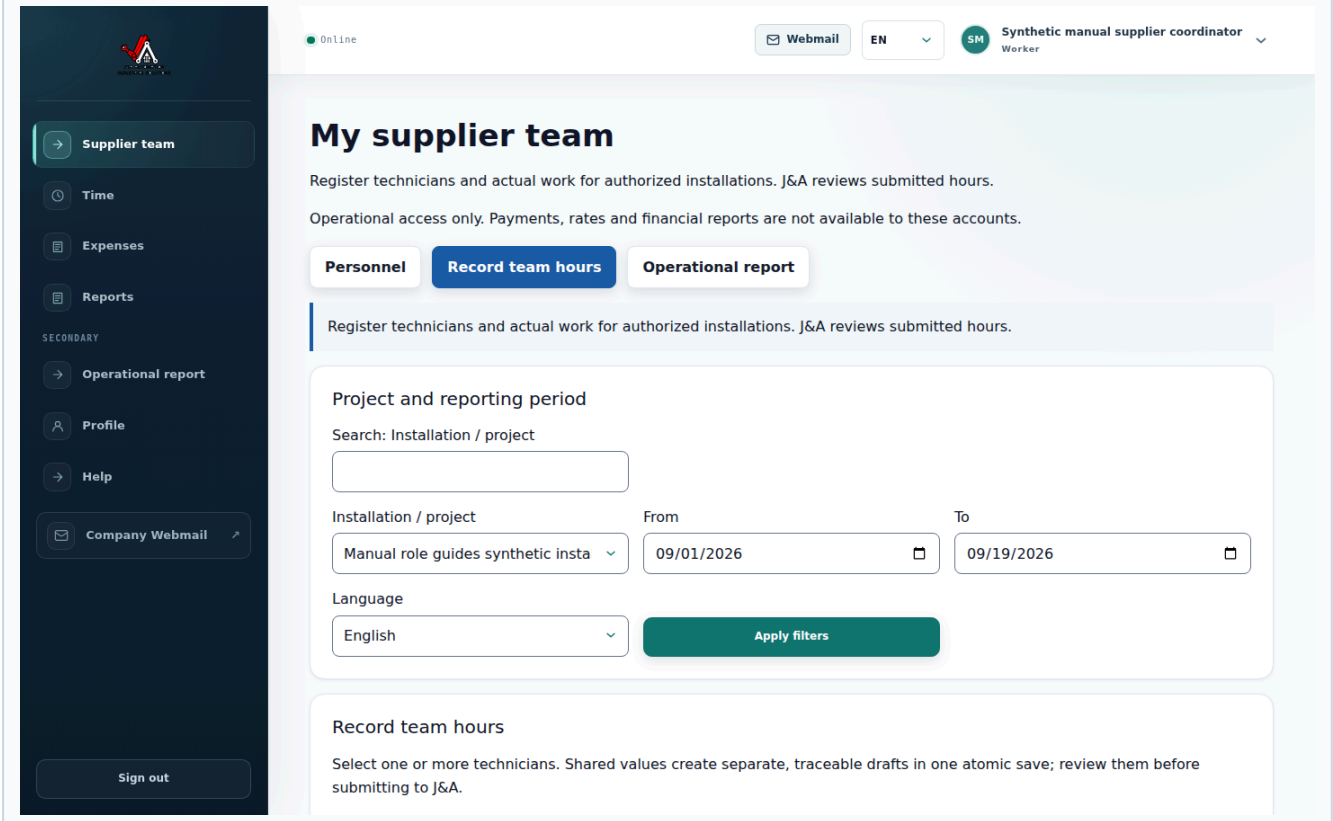

Help: download the guide assigned to this account

`/app/help?lang=en` · 1440 × 900

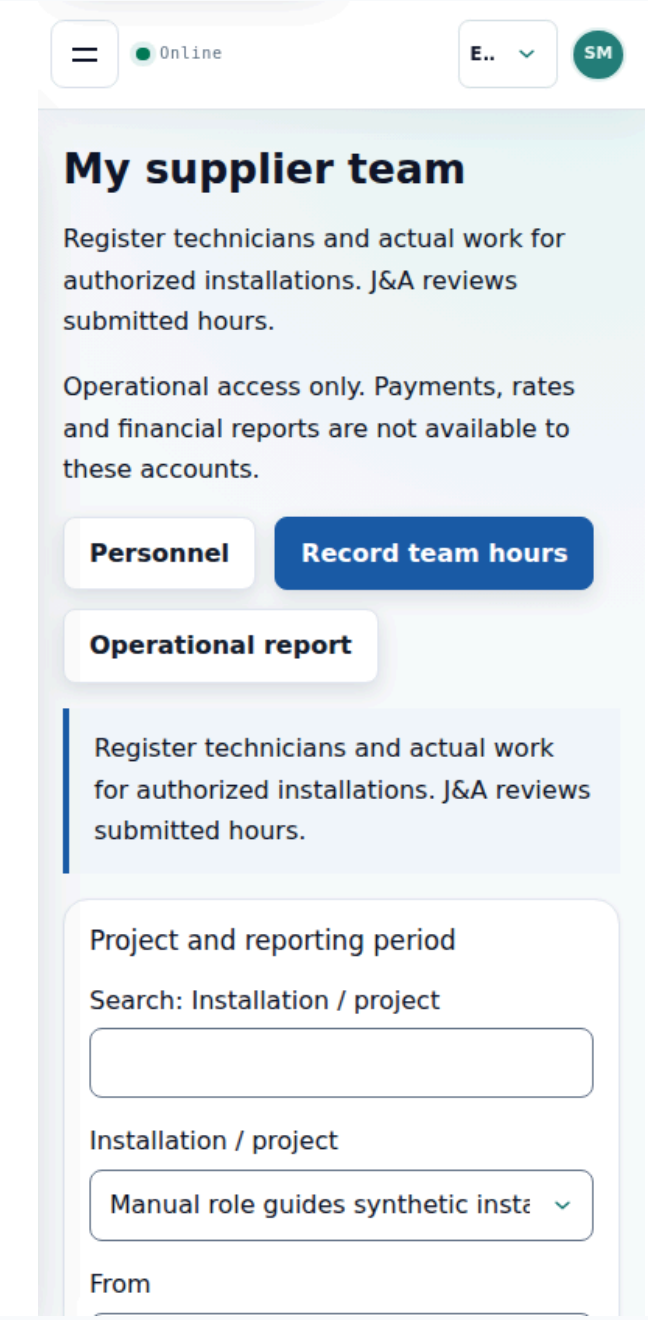

Profile: language, own identity and security settings

`/app/profile?lang=en` · 1440 × 900

Supplier team: authorized installation and technician work

`/app/supplier?projectId=01a0b917-c2aa-733f-be84-99a693bf7d46&lang=en` · 1440 × 900

Mobile home: the same authorized navigation on a narrow screen

`/app/supplier?lang=en` · 390 × 844
