Before you practise · access and scope

This English guide uses BBS · Ejemplo de manual, project C-0050-P-20261005. The screenshots were taken using the stated role in an isolated database running the application. Training entries, payments, approvals and documents are fictional. They do not prove a real bank transfer, accountant approval or customer acceptance.

The company portal at <https://j-aautomation.com/j-aautomation/app> is LIVE. Training uses a separate URL and database. Before practising, obtain the isolated URL, your own role account and permitted exercises from the company administrator; verify the BBS project number. Without isolated access, treat these screenshots as read-only demonstrations and perform only authorized real work.

Use your own credentials. Do not borrow an Owner, Finance or colleague account. A platform role, project assignment, review permission, supplier authorization and dated crew delegation are separate requirements. Changing one does not automatically grant the others.

Select English in the workspace language control to follow the labels used here. Some saved BBS record names remain in their original language. On a phone open the navigation drawer to see full workspace names. Recheck the selected project and date range after every navigation.

The eight Worker test accounts in the private credentials document use the same Worker workflow. Crew chief is a dated delegation attached to a Worker account. Supplier Coordinator and External Technician are restricted profiles attached to Worker accounts. This guide never includes account passwords.

Each screenshot is an exercise checkpoint. Later fictional role entries and financial events are additional to the original October 1–5 workbook totals. Reopening the project or selecting the same dates does not restore that checkpoint. Read captions before comparing amounts or states.

Verify the result

- Confirm your displayed account, role or supplier profile, the project number and the dates before saving.
- For training access, scope or reset help, contact the company administrator at admin@j-aautomation.com. Include the role, route, project number, time and visible error; omit passwords, cookies and private customer or worker documents.

If you get stuck

- An empty project selector often means missing or expired assignment or authorization. Ask the Owner to check coverage for the date you are entering; do not create a duplicate project.
- A form shown in a screenshot can depend on role, source state or effective date. Use the documented role handoff when a control is absent.

Understand Chief authority before recording crew work

Isolated BBS role lab · genuine Chief Worker account · dated October 1–31 delegation

Go here: [Sign in](#) → [Crew hours](#)

Chief is an ordinary Worker account with dated person/project delegation. Account role, project assignment, crew-chief delegation and Can review permission are separate. In this BBS example the Chief may record for Worker 1 and Worker 2 during October 1–31; assignment review permission is off.

Before practising obtain an operator training URL, own account, visible environment identity, permitted scope and reset instructions. No shared training credentials are provided. Live company links remain live company services. Every illustrated mutation here is fictional and isolated.

Crew hours handles delegated operational entry. Time, Expenses, Reports and My Pay still handle your own Worker records. Delegation does not reveal crew compensation or grant Finance access; Chief authenticated Approvals and Finance requests returned 403.

Do the task

1. Confirm your own Chief account and the isolated environment. Open Crew hours.
2. Select Project and Work date, then Show project. Check that intended members are offered for this date.

Verify the result

- The delegated crew list is date-specific. The October 1–31 grant covers the worked October 6 and 15 examples.

If you get stuck

- Ask the Owner to correct expired/missing delegation or assignment. Do not select another account to gain access.

Understand Chief authority before recording crew work

PROJECT WORKFORCE

Project crew time

Record actual hours for each delegated person. Each row stays tied to its worker and follows the normal approval process.

Project Work date

Online EN

Log team hours

Use one worker for a single entry, or select several. Shared hours apply **to each selected worker**; individual hours let you enter a different amount per person.

Team members

☒ BBS DEMO - Tecnico 1

☒ BBS DEMO - Tecnico 2

How to enter hours

☒ Same hours for each selected member

☐ Different hours for each member

Hours per member

Enter decimal hours, for example 7.5.

Time category

Work performed

Actual Chief delegated entry controls; authority comes from dated grants, not the word Chief.

Save the same actual hours for multiple crew members

Isolated BBS role lab · genuine Chief Worker account · dated October 1–31 delegation

Go here: Crew hours → Log team hours

Same hours for each selected member means the full duration applies to each person. Two selected workers at 2 h creates two 2 h sources, total 4 actual hours; it does not split a shared 2 h total.

The October 6 bench setup is explicit simulated activity with no live equipment changes. Each saved row retains its worker and source ID.

Do the task

1. Select Project and Work date and Show project. Tick only the authorized Team members who actually worked.
2. Choose Same hours for each selected member. Enter Hours per member 2, category and Work performed.
3. Leave Submit for approval now off to inspect the saved drafts; use Save 2 people. Inspect each 2 h row.
4. Use each intended row's Submit action and confirm Submitted.

Verify the result

- Two separate 2 h sources were saved and submitted; both remain awaiting operational review in this packet. Chief did not approve them.

If you get stuck

- If one person/time is wrong, correct that draft through its permitted row controls before submitting. Do not save another batch while trying to locate the first one.

Save the same actual hours for multiple crew members

☐ Submit for approval now

Entries saved as drafts can be submitted later. Submission does not approve your own crew hours.

Allocate one crew receipt

First save a receipt expense for one delegated worker using the "Add expense" link above. Select that expense here and split its amount across at least two crew time rows. The receipt stays **one expense** for billing and reimbursement; the split only records which workers and shifts it covered. Worker reimbursement and customer billing follow the selected expense's payer and worker policy.

Save a receipt expense and at least two crew time rows for this project and date to allocate a shared receipt.

Native saved 2 h+2 h Draft rows for the two selected delegates.

Save the same actual hours for multiple crew members

Both separate sources Submitted; review permission remains a separate handoff.

Use different actual hours and submit deliberately

Isolated BBS role lab · genuine Chief Worker account · dated October 1–31 delegation

Go here: Crew hours → Different hours for each member

The October 15 exercise entered 0.5 h for Worker 1 and 1 h for Worker 2, category Travel. Individual hours reflect each person's actual activity. Checking Submit for approval now combines save and submission; it does not approve the work.

Do the task

1. Select the authorized members and Different hours for each member. Enter each worker's hours, category and shared factual Work performed.
2. Review the selected date/member names and tick Submit for approval now only when ready. Use Save 2 people.
3. Inspect both resulting rows and their states. The PM approved Worker 1's 0.5 h and returned Worker 2's 1 h for 0.75 h correction.

Verify the result

- Separate 30 minute and 60 minute sources were saved as Submitted. Their later review outcomes are independent.

If you get stuck

- An absent member or blocked date requires Owner delegation/assignment review. An unsent row can be corrected through its current controls; reviewed history requires the proper linked process.

Use different actual hours and submit deliberately

Log team hours

Use one worker for a single entry, or select several. Shared hours apply **to each selected worker**; individual hours let you enter a different amount per person.

Correct a delegated returned entry

Isolated BBS role lab · genuine Chief Worker account · dated October 1–31 delegation

Go here: Crew hours → View time → Create corrected draft

The genuine PM returned Worker 2's 1 h travel source with a 0.75 h reason. The delegated Chief could create and submit a linked replacement because the October 15 period was outside that worker's finalized October 1–14 settlement. Delegation is still checked for the source/date.

Do the task

1. Open the returned crew source using View time. Read Needs changes and the reviewer's reason.
2. In Create corrected draft enter Reason, Work date, Time category, Actual hours 0.75 and factual Work performed. Create the correction.
3. Inspect the new Draft and original link. Use Submit for approval now on this crew correction detail.
4. After PM review, refresh the selected date and inspect the Approved replacement.

Verify the result

- The original 1 h remains Needs changes; the linked 45 minute 0.75 h replacement is Approved. Worker 1's 0.5 h remains separately Approved.

If you get stuck

- A settled/paid compensation guard requires Finance's explicit adjustment; do not duplicate a crew entry or change its date/person to evade it. The Chief does not gain self-approval by creating a correction.

Correct a delegated returned entry

Record one crew expense with its actual payer

Isolated BBS role lab · genuine Chief Worker account · dated October 1–31 delegation

Go here: Crew hours → Add expense for [worker]

The Chief recorded one explicitly synthetic USD 20 meal receipt for Worker 2, paid by Worker. The link preselects the delegated worker/source. Record expense for is restricted to the Chief and authorized delegates; it does not grant arbitrary person access.

Expense owner, payer and later allocation are distinct. A Chief can record delegated operational facts without seeing another worker's reimbursement details. No real purchase or transfer occurred.

Do the task

1. From the intended crew row choose Add expense for that worker. Check Record expense for, Project, Date and related hours.
2. Attach the single receipt and fill Category, Amount 20, Currency USD, Who paid and factual Description. Save draft.
3. Open the saved detail and inspect the source/receipt/payer. Use Submit only after the receipt allocation and facts are verified.

Verify the result

- Exactly one USD 20 expense was saved. Genuine PM operational approval followed submission. Finance classification/payment is a separate handoff.

If you get stuck

- Use permitted draft/correction controls for wrong values. Do not create a separate full 20 expense for every crew member.

Record one crew expense with its actual payer

Split one receipt across worked sources

Isolated BBS role lab · genuine Chief Worker account · dated October 1–31 delegation

Go here: Crew hours → Allocate one crew receipt

Allocation distributes a single purchase across source shifts; it does not multiply the purchase, choose new reimbursement recipients or create invoices. The USD 20 receipt was split 10+10 across the two October 6 crew sources.

The selected set must include at least two valid crew time sources and the expense's initially related shift. The allocation sum must match the one receipt amount.

Do the task

1. Select the saved Receipt expense and the related crew time entries.
2. Enter Amount for worker 10 for each of the two selected sources, then Save receipt allocation.
3. Refresh Allocate one crew receipt and inspect the saved split and expense total.

Verify the result

- One expense USD 20 remains; allocations USD 10+USD 10 sum 20. The originally linked Worker 2 shift is included.

If you get stuck

- Allocated receipts can lock draft edit actions. Investigate the existing allocation/expense with the reviewer rather than making duplicate expenses or altering hours to force a split.

BBS DEMO - Tecnico 2: 10.00 USD

Actual saved split of one USD 20 receipt; allocation is not worker payment.

Hand operational work to the permitted reviewer

Isolated BBS role lab · genuine Chief Worker account · dated October 1–31 delegation

Go here: Crew hours → submitted sources; reviewer → Approvals

The Chief's delegation permits the exercised recording/correction operations, but this Chief has no review permission. The genuine assigned PM reviewed the sources using its own account. Finance then reviews financial treatment where applicable.

Operational approval, billability, customer invoicing, worker settlement, reimbursement and cash payment are separate stages. A Chief should not assume a submitted row is paid or invoice-ready.

Do the task

1. Inspect each member's source state after submission. Send the PM record IDs, work date and any material evidence or safety concern.
2. Read a returned reason on the actual source. Correct through the permitted linked flow; do not silently overwrite history.
3. Hand financial policy/settlement issues to Finance/Owner.

Verify the result

- Worker 2 corrections and Worker 1 Oct 15 travel are Approved. The two October 6 shared 2 h crew rows remain Submitted in this evidence packet.

If you get stuck

- If Approvals is denied, ask the Owner who has review permission. Never borrow the reviewer's account.

Record and submit your own Chief hours separately

Isolated BBS role lab · genuine Chief Worker account · dated October 1–31 delegation

Go here: Time → Log time; Submit this week

The Chief's own actual work belongs in its own Worker Time workspace. Crew entries for delegates do not include the Chief's duration. The exercise saved 0.25 h own handover on October 6.

This ordinary own draft was submitted using the native Submit this week flow. Bulk submission concerns your own selected-week drafts; it is not a universal batch submission of everyone's crew records.

Do the task

1. Open Time, choose Log time and record your own project/date/actual hours/activity. Save draft and inspect the row.
2. Open Submit this week, select the week beginning October 5, inspect its one draft and choose Submit all week drafts.
3. Open the source and confirm Submitted; the genuine PM subsequently approved it.

Verify the result

- One own 15 minute Chief source progressed Draft → Submitted → Approved. Delegated member durations are separate.

If you get stuck

- Check the own draft count before submitting a week. For linked or financially guarded sources use exact record controls and Finance handoff.

Record and submit your own Chief hours separately

J&A AUTOMATION

Record and submit your own Chief hours separately

Own Chief source Submitted; PM approval followed.

Write a Chief daily handover report

Isolated BBS role lab · genuine Chief Worker account · dated October 1–31 delegation

Go here: Reports → New daily report

Chief reporting uses the Chief's own author account. The native own Daily form has no arbitrary-worker selector. Delegated time entry does not imply report author impersonation.

Write factual crew coordination/conditions, with member source IDs when needed. A Daily report does not replace each actual timesheet or prove customer acceptance.

Do the task

1. Select Project, Work date and Site / shift; fill Shift summary and Tasks completed. Include actual problems/actions, downtime, standby, open items, next day plan and safety flag where applicable.
2. Use Save daily report. Inspect the Draft, then Submit for review.
3. Confirm Submitted and the permitted reviewer's later state.

Verify the result

- Chief own fictional crew-handover report was saved, submitted and operationally approved by the genuine PM.

If you get stuck

- Use draft edits before submission. For later corrections, preserve approved history and follow the offered report correction or reviewer handoff.

Write a Chief daily handover report

Own Technical Submitted; operational approval followed.

Read only your own pay and reimbursements

Isolated BBS role lab · genuine Chief Worker account · dated October 1–31 delegation

Go here: My Pay → Apply period

The Chief sees its own compensation, not crew members' agreements/payments. The historical October 1–4 snapshot shows 10 actual hours, USD 400 approved compensation and USD 20 approved reimbursement; copied training payment records have no claim to a real bank transfer.

Customer daily/weekly/hourly units and invoice cadence do not dictate worker settlement or payment cadence. Expected date, reviewed amount, paid and remaining are different fields. Source estimates follow dated worker rules, not crew receipt allocations.

Do the task

1. Select your intended From / Through dates and Apply period.
2. Read approved/pending estimates separately, then the reviewed settlement's own period, planned date and paid/remaining values.
3. Use Worker statement generation only for your own account and wait for ready artifacts before downloading.

Verify the result

- Crew hour delegation does not expose Worker 1/2 private pay. A split receipt does not create compensation or prove reimbursement.

If you get stuck

- Send missing-rule/settlement/reimbursement questions to Finance with your own source/period. Do not infer another person's pay from recorded hours.

Read only your own pay and reimbursements

The screenshot displays the 'My Pay' section of the J&A system. The left sidebar contains navigation options: Today, Time, Expenses, Reports, SECONDARY, Crew hours, My Pay (selected), Profile, and Company Webmail. The main content area shows the 'My Pay' title with a 'Print report' button and a search bar. Below this, a date range selector shows 'From 10/01/2026' and 'Through 10/04/2026' with an 'Apply period' button. A 'Worker statement' section includes a 'Generate report' button. Two summary cards are displayed: 'APPROVED COMPENSATION - USD' showing '\$400.00' (600 approved minutes) and 'APPROVED REIMBURSEMENTS - USD' showing '\$20.00' (with estimated amounts awaiting approval). A 'Payment still outstanding' section states that no reviewed payments or approved reimbursements are outstanding in this period.

BBS DEMO - Tecnico 1 · 0.5 h · Travel BBS ROLE GUIDE - synthetic individual crew travel; correction exercise · Submitted	View time	Add expense for BBS DEMO - Tecnico 1

Allocate one crew receipt

First save a receipt expense for one delegated worker using the "Add expense" link above. Select that expense here and split its amount across at least two crew time rows. The receipt stays **one expense** for billing and reimbursement; the split only records which workers and shifts it covered. Worker reimbursement and customer billing follow the selected expense's payer and worker policy.

Save a receipt expense and at least two crew time rows for this project and date to allocate a shared receipt.

Native 768 pixel Chief crew viewport.

Manage your own profile and ask for support

Reference procedure · current controls/source checked; mutations not exercised in this role lab

Go here: Profile; Notifications; Help

Profile expertise and availability affect planning, not delegation/review permission or actual hours. Security belongs to your individual account: passkey Device name/Register passkey and authenticator setup/recovery should be kept private. These changes were not performed in the Chief lab.

Notifications can lead to returned sources or pending work; marking read does not approve them. Help's verified contact is admin@j-aautomation.com. Live portal/webmail links are live services. No support message was sent.

Do the task

1. Maintain genuine own expertise/availability using offered Profile controls. Ask the Owner for crew delegation, account status or review permission changes.
2. Follow a notification to its current record and inspect state before acting.
3. Send support the environment, role, project/record ID, date, intended action and exact message. Exclude credentials/private pay.

Verify the result

- Chief GET Finance and Approvals returned 403. Delegation is not financial or approval authority.

If you get stuck

- If a crew member disappears, check selected date and Owner-grant coverage. If a source is settlement locked, hand it to Finance; do not substitute credentials or duplicate history.

Verify the crew handover

Isolated BBS role lab · genuine Chief Worker account · dated October 1–31 delegation

Go here: Crew hours → Reports → own Time → reviewer handoff

Use a single handover list for the selected workday; crew recording, your own work and financial review remain separate.

Do the task

1. Confirm environment/account/project/date and delegated member coverage.
2. Save each member's actual duration/category once; inspect shared per person versus individual amounts.
3. Record each purchase once; allocate one shared receipt only across valid linked shifts and verify the sum.
4. Submit intended crew rows and your own Time/report drafts.
5. Read review returns and create linked corrections where allowed. Send settlement guards to Finance.
6. Confirm current member states and own report states; tell PM which sources remain Submitted/open and which risks remain unresolved.

Verify the result

- Lab passes: shared/individual native crew entry, separate Submitted sources, single receipt 20 allocation 10+10, delegated correction 1 → 0.75 PM Approved, own weekly time Submit and own Daily/Technical PM Approved, denied Approvals/Finance and responsive views.

If you get stuck

- Reference-only: delegation/account setup, review-enabled Chief actions, draft withdrawal, report attachment/PDF/customer acceptance, own security/profile mutations, bank/email delivery and actual payroll. The illustrated Chief had no review permission.

What was verified and what remains a reference

Isolated BBS role lab · actual browser outcomes and explicit limits

Go here: Verification appendix

Native authenticated browser records, synthetic receipt fixtures and SHA-256 capture manifests are maintained with the guide. Account secrets are excluded. Original billed October 2–5 history and finalized worker settlements were preserved.

Actual saved/submitted/returned/approved states are distinguished from controls merely inspected. The Owner/PM/Finance handoffs used their own genuine role sessions. This evidence does not claim real bank transfers, live equipment changes or production transactions.

Do the task

1. Chief used an ordinary Worker account with dated October 1–31 grants for Worker 1/2.
2. Shared two-hour-per-person entries saved as separate drafts and submitted; both remain awaiting operational review.
3. Different 0.5-hour/1-hour Travel entries saved and submitted; PM approved the first and returned the second.
4. Delegated 1-hour source corrected to 0.75 hour through a linked replacement, submitted and PM approved.
5. One USD 20 receipt allocated 10+10 across two crew sources, submitted and PM approved.
6. Chief own Daily and Technical reports saved, submitted and PM approved.
7. Chief own 0.25-hour source saved, submitted through its own weekly flow and PM approved.
8. Own My Pay historical training snapshot inspected; no crew private compensation exposed.
9. Approvals and Finance denied; desktop/tablet/phone Crew pages fit their viewports.

Verify the result

- See the adjacent task checklist and role capture manifest for source IDs, screen widths, artifact integrity and expected permission denials.

If you get stuck

- Reference-only or unperformed here: Account/delegation changes; Review-enabled Chief approval actions; Draft withdrawal; Report attachment/PDF/customer acceptance; Profile/security changes; Actual bank/email delivery.
