J&A Automation · Reviewed 11 October 2026

Historical manual

The following pages describe an earlier release. Screen layout, navigation, approvals and digital workflows have changed. Use the current role manual before performing a task.

Current manuals: Owner, Finance, Project Manager, Auditor, Worker, Crew chief, Supplier Coordinator and External Technician. The current role PDFs are English; Help identifies the language fallback.

Open current Help and role manuals

Earlier screenshots, examples and their original page numbers are retained as historical evidence. This cover does not certify those instructions against today’s application.

Project manager guide

Revision 2026-09-19 · Validated capture: 2026-09-19T09:56:05.809Z

Contents

1. Scope and navigation
2. Clickable project and planning calendars
3. People, skills and availability
4. Operational review
5. Troubleshooting

Scope and navigation

Sign in with your own account. Your project access follows active assignments and effective dates. **Projects**, **Planning**, **Approvals**, **Reports** and **Profile** show only authorized operational work. Billing, commercial rates, accounting and audit are separate authorities. Use **Help** for this guide and **Activity Inbox** for links to permitted source records; reading an alert is not approval.

Clickable project and planning calendars

In **Projects**, expand **Project calendar** to view authorized projects. Previous/next month and **Today** move the month. Select a day to see its agenda; open a project event to inspect the actual project and team. In a project, the **Team** calendar shows that project's planned shifts. A project end date is inclusive; shift end timestamps are exclusive.

Open **Planning**, select the correct project and worker filters, then select a date in the calendar. The start/end fields are prepared for that day; review them before publishing. Select an existing shift in the agenda to open its project and team; editing a published shift is an Owner action. Check the worker's availability and overlapping shifts before **Publish assignment** for a project in your scope. A blocked overlap or unavailable window requires a different date or a corrected availability record, not a second conflicting shift. Times are displayed and entered in **UTC**. Publishing a shift does not generate actual time, a payment or customer acceptance.

People, skills and availability

Open **Profile** for your own skills and availability. The calendar opens **Add availability** from a day and **Edit availability** from an existing window. Choose Available, Unavailable or Tentative, enter the UTC window and note, then save and verify. The view shows the latest 200 windows. A stale version asks you to reload before retrying. You may inspect and manage an active teammate only when the person belongs to one of your effectively assigned projects; use the selected person's profile, not your own identifier. Self-declared skills remain unverified until administrative review. You cannot inspect unrelated workforce profiles.

Operational review

In **Approvals**, inspect submitted time, receipts or reports and their evidence before approving or requesting changes. The queue prioritizes pending items. **Project approvals** covers authorized milestones; a separate Finance review decides financial treatment. In **Reports**, review factual Daily and Technical / PLC records and period follow-up for your project. Internal approval is not customer signature, invoice issuance or a bank transfer. Preserve history through the correction workflow and a reason.

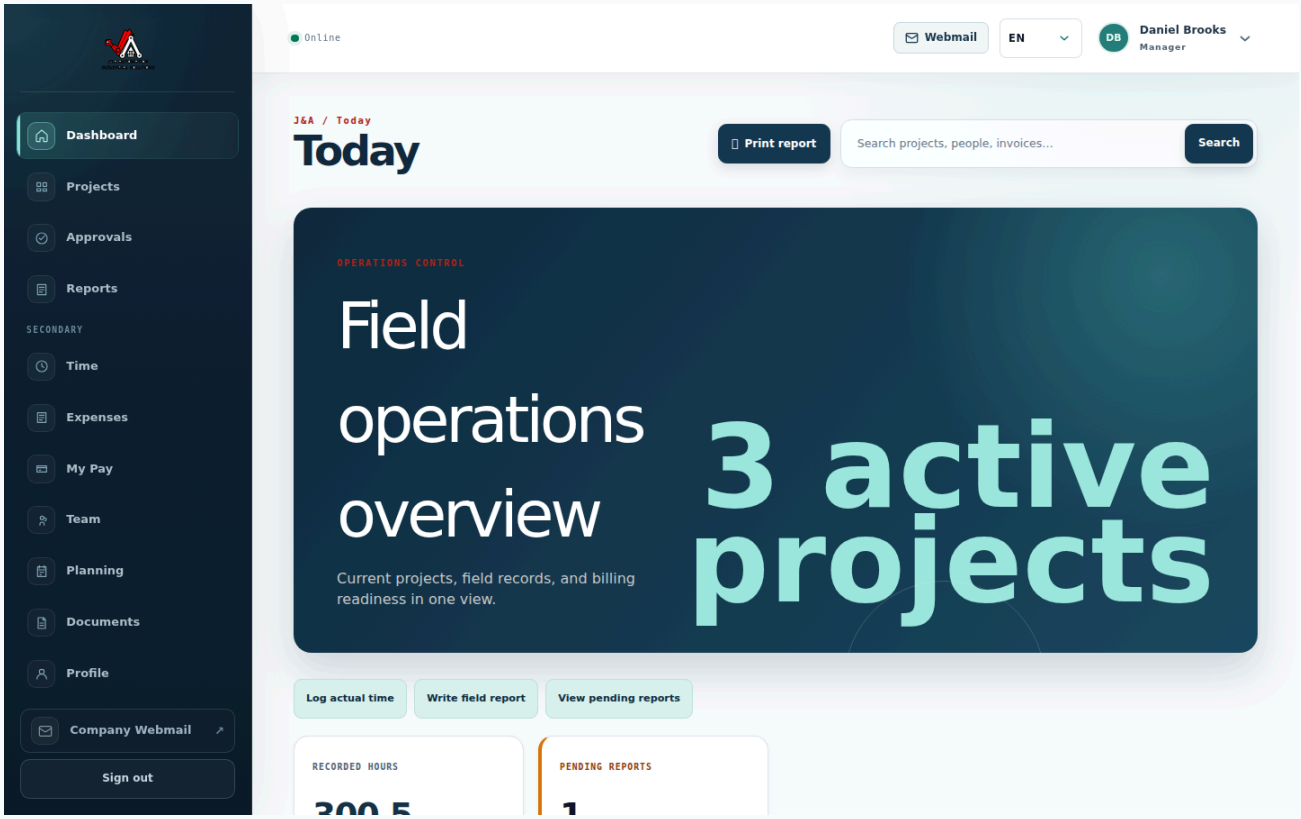

Troubleshooting

If a project or worker is missing, verify your assignment dates and project filter. If a shift cannot publish, inspect availability and overlaps. If a profile edit is rejected as stale, reload it. Do not

substitute another project, worker or date. Send unresolved access or evidence questions with the record reference to **admin@j-aautomation.com**.

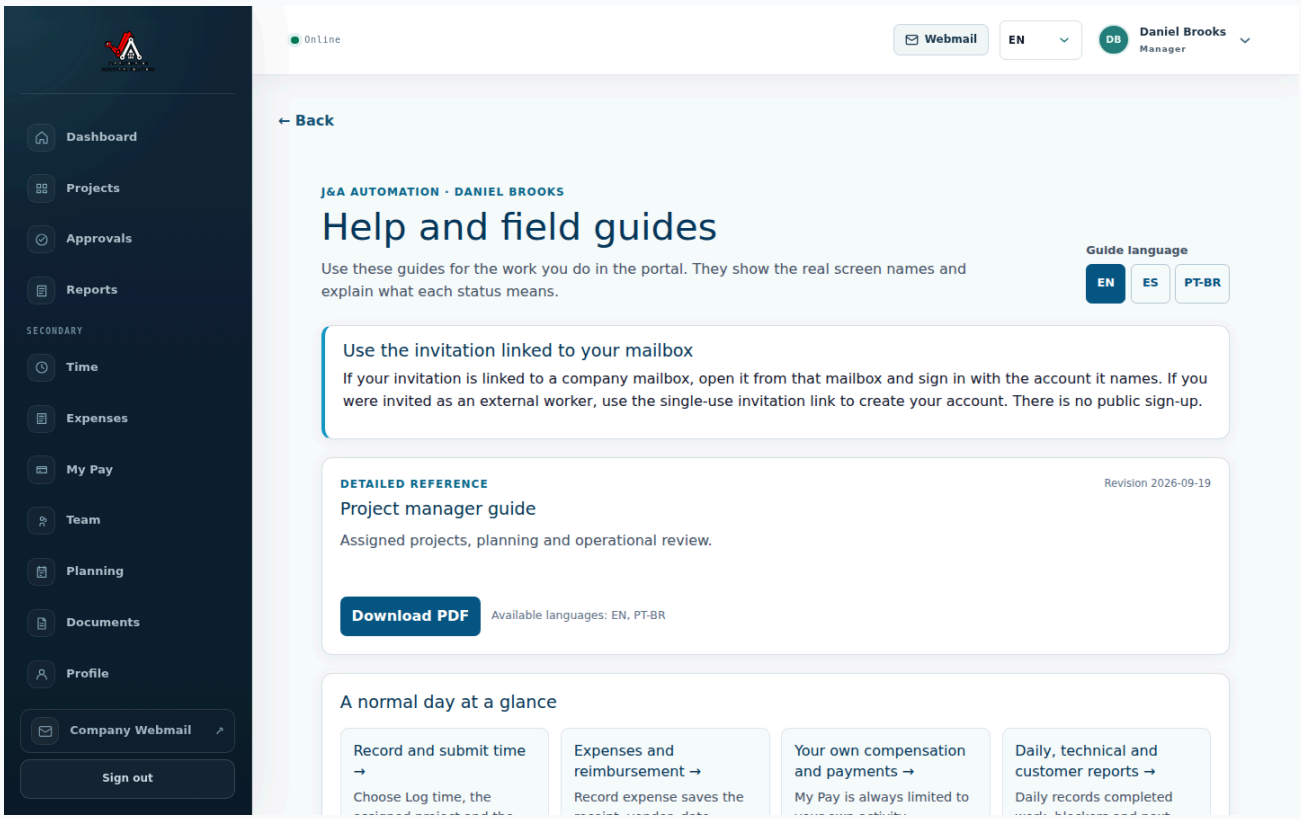

Real application screens with synthetic data

Captured with this role signed into an isolated application; no customer data is shown.

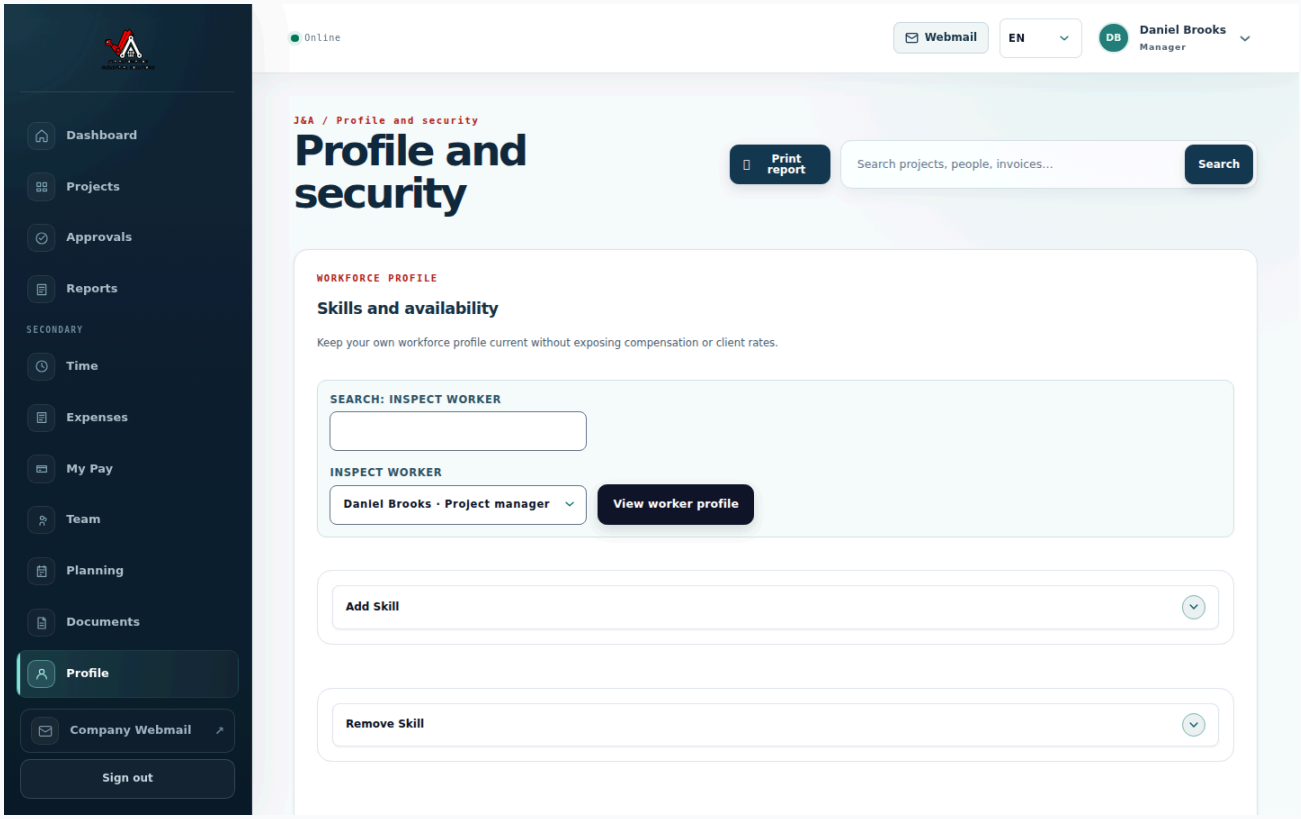

Start here: navigation and work available to this account

`/app?lang=en` · 1440 × 900
