SET UP THE WORK

People + project context → commercial readiness → actual work

CONFIGURE AND RECORD

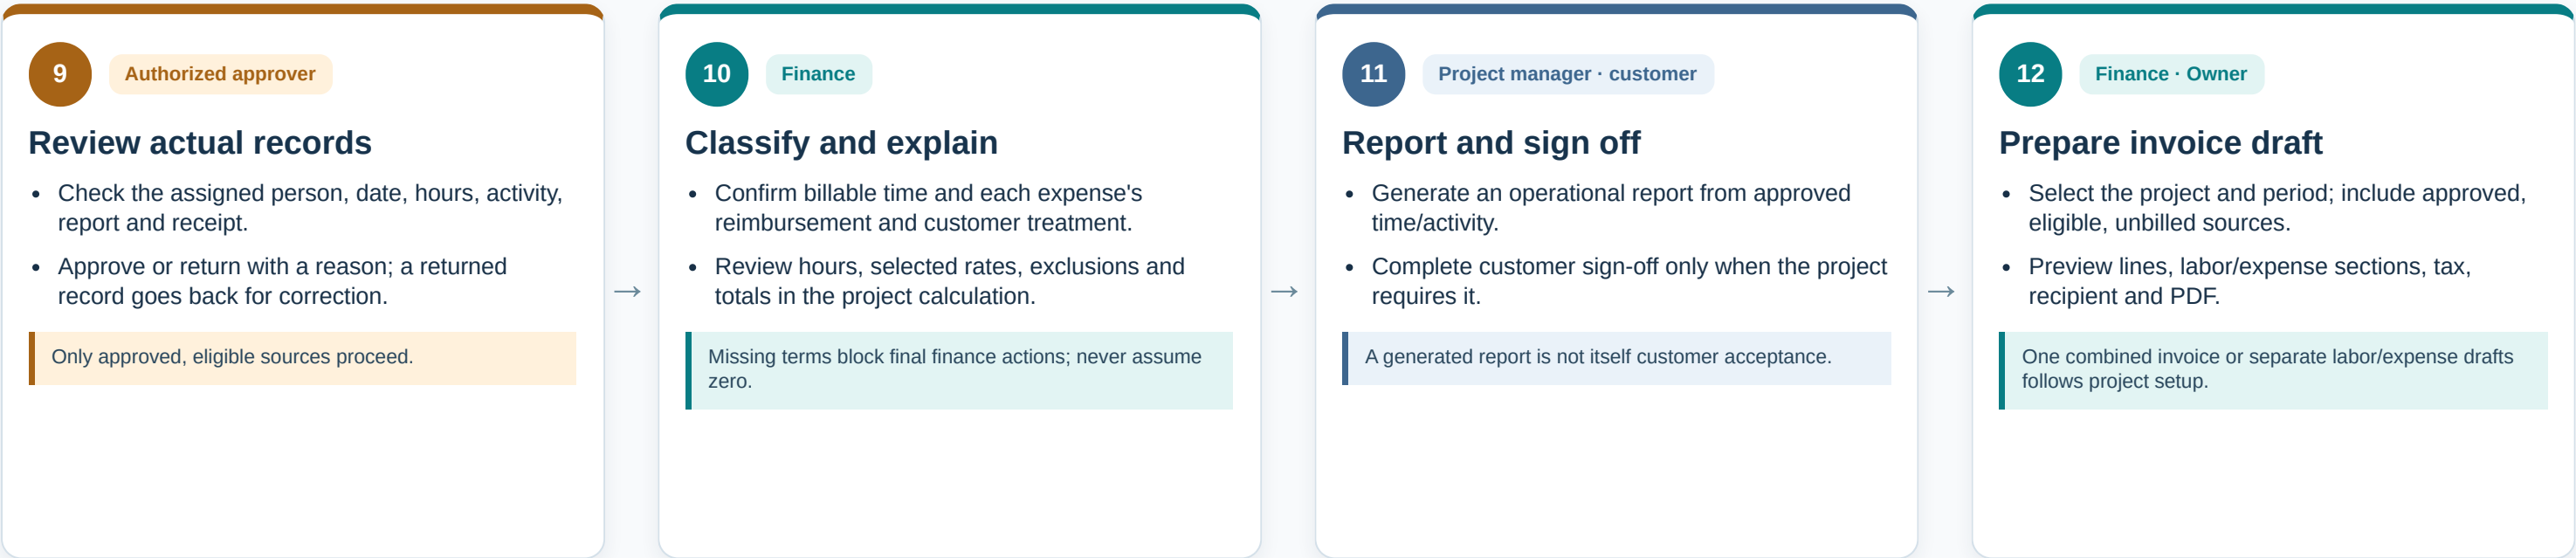

Project settings and forecasts do not create worked hours. A chief can enter only for explicitly delegated people and cannot approve their own team submissions.

From submitted work to payment

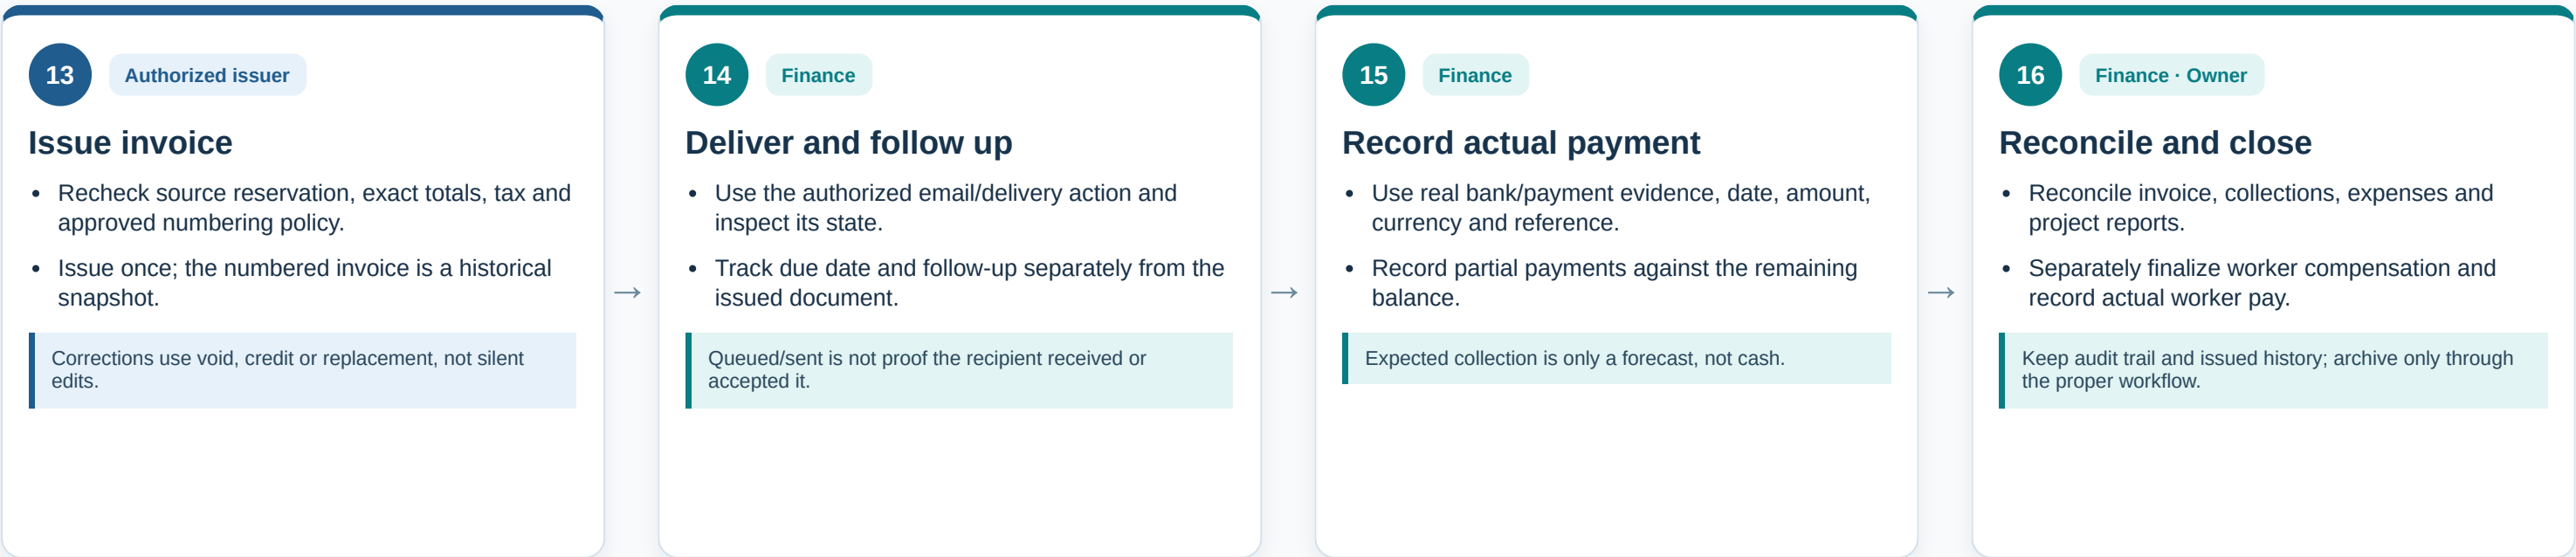

2 · Review sources, invoice the approved work, reconcile actual payment

Role colors **Reviewer** **Finance** Project manager Owner / issuer Customer

VALIDATE THE SOURCE OF EVERY AMOUNT

ISSUE, DELIVER AND RECONCILE

Role boundaries: workers see their own pay; chiefs and project managers do not gain coworkers' private compensation. Customer reports contain operational work, not internal rates. A test or preview does not prove a live invoice was issued, delivered or paid.
